

ANNUAL PROGRAM REPORT OF HCG FOUNDATION FROM APRIL 2018 TO MARCH 2019

Introduction: HCG Foundation is a unique not-for-Profit initiative that has been set up under the aegis of Dr B. S. Ajaikumar in December 2006. The particular focus for setting up the Foundation is to help children affected with Cancer and economically marginalised Cancer patients. (Special Emphasis on Children - Females - Breadwinner of Family).

Mission:

- Provide financial support to those who cannot afford cancer treatment
- Spread awareness about cancer
- Make early detection services more accessible for rural communities
- Provide psychological support to the family of cancer patients
- Educate students on healthy lifestyle habits and cancer prevention
- Sponsor, promote and conduct research activities towards prevention, treatment and eradication of cancer

Board of Trustees:

Sl No	Name	Designation in the Trust
1	Dr. B S Ajai Kumar	Trustee
2	Dr. Ganesh Nayak	Trustee
3	Mr. V Vasudevan	Trustee
4	Mr. G Ganapathi	Trustee
5	Mr. Satish Shenoy	Trustee
6	Dr. Vivek Sharma	Trustee

Financial highlights:

HEALTH CAMPAIGN AT SCHOOLS

A new initiative of the HCG Foundation is to work with schools in trying to create awareness amongst the younger generation on healthy lifestyle habits. The program is designed for 6 sessions and the first of this was conducted at United Mission School by our volunteer Shivaprasad. There are nine more schools in the pipeline for this program.

FOUNDATION FIGHTER MUDASSIR (13 YRS OLD)

For Moula and Mohsina, life was all about their family and its welfare. Moula who worked in a Madrasa, earning only Rs 7000 did his best to take care of the needs of his family of 6. So nothing prepared them for the jolt when Mudassir, their 13 year old was diagnosed with Cancer. When borrowing large amounts from friends and relatives didn't suffice, Moula approached the HCG Foundation for help. Mudassir is now responding well to treatment that was made possible with the financial help.

FOUNDATION FIGHTER SHRINGERI (21 YRS OLD)

Shringeri, a young energetic college student was preparing for her final semester B.Com examinations when she was diagnosed with a rare form of uterine cancer which needed urgent treatment. Shringeri's father had left them few years ago and her mother Lakshmi, took care of the family. Shringeri's dream was to finish her studies and get a job so she would be able to help support her family. Lakshmi managed to gather some money for the initial treatment from the little savings she had and by taking loans from relatives. But the need for two more chemotherapy sessions and 28 sittings of radiotherapy was financially out of her reach. HCG Foundation stepped in to aid Shringeri from the second cycle of chemotherapy onwards. Despite undergoing treatment, Shringeri studied and attended her examinations and cleared them. She has since completed her treatment and is ready to pursue her dreams. Her doctor is positive that she will do well and has not suggested any further treatment.

HEALTH CAMPAIGN AT SCHOOLS

Nutrition session was conducted by HCG Hospital's senior dietician, Sonali Datta at Mission School. 5th and 6th Std students got benefited with this program. The session discussed some of the problems unhealthy eating causes and how it continues well into adulthood. Unhealthy eating can even develop into lifelong diseases such as Cancer. The session was aimed to educate the students on healthy food habits. Sonali explained the benefits of eating vegetables and fruits as well as the detriment of junk foods with the help of fun filled activities with the students. The interactive session gave insight about the on-going eating habits of children and unhealthy eating habits were rectified with nutritious healthy food habits.

Let it go let it fly – Art therapy Activity – 29th Sept 2018

Art therapy is an expressive language of the conscious and the unconscious minds. Thus, it makes us understand and assimilate things much more easily. Art Therapy is capable of promoting self-expression, feelings, and emotions. When someone comes to an art therapy session, they have the opportunity to use a range of art materials to explore & express feelings in a different yet effective way.

Art therapist Shah Sabreen, conducted a program on art therapy for the children at the hospital, with an aim to release all bottled up emotions, drive away negative emotions while absorbing positive energy. They did this by creating drawings or notes and then attaching the same to a balloon and setting it free.

The main goal was to make children express things that they cannot or will not always explain verbally. This kind of therapy opens up avenues of communication other than verbal, allowing one to express themselves without barriers. Art Therapy activity is one of many programs that helps people towards better health and happiness.
